MIDDLE SCHOOL TECHNOLOGY CROSS CURRICULAR BEACH PROJECT

ACES students are learning about technology and nature through a cross curricular program.

ACES technology teacher, Ms. Ketcham and her students are creating websites during a class study on South Florida Oceans and Beaches. As students complete assignments about beach and ocean related topics the studies are then added to their website along with science-based material learned during class. The students are also integrating other Web 2.0 Technologies to make the web sites interactive. The beach trip is just one small aspect of the month long program. This is the 3rd year of the cross curricular project.
